# Esports Tournaments Statistics

This section provides access to all the esports and related events data collected by our team. By this we mean the top-discipline World Championships and charity festivals for casual gamers alike. Many of the geek events also fall within our sphere of coverage.

The special event pages contain more detailed information of a wide spectrum. It ranges from the more widely-known aspects (such as the prize pool and venue) to the exclusive viewership statistics data (average number of viewers, most popular matches, broadcast peak figures and much more).
